

## CPR PROFESSIONALS DENTAL PROFESSIONAL - REFERENCE GUIDE

CPR Professionals has especially customized our CPR training for Dental Professionals. We tailor the American Heart Association BLS CPR training so we're able to conduct the training on-site in the dental office. This makes it possible for us to use realistic scenarios so when the next emergency occurs the dental professionals will have a good recall of the procedures and act fast with quality performance. **Please read on to see why your next CPR class is far from dull.....**

### WHAT SETS CPR PROFESSIONALS APART FROM OTHER TRAINING FIRMS

Many of our over 400 clients, since 2005, have shared they are very pleased with our unique training format and say that CPR Professionals excels in the 5 following areas

#### 1. CUSTOMIZED FOR DENTAL PROFESSIONALS

Although we will train off-site if that is what our client wants, we suggest that the training be on-site whenever possible. On-site makes it possible to teach skills needed for real life emergency scenarios that could happen in a dental office, such as:

- Hygienist completes cleaning a patient's teeth – leaves the room to get the Doctor – comes back and the patient is slumped over and unresponsive in the chair
- A patient is checking in at the front desk and all of a sudden he or she goes down on the floor
- A patient may go to the bathroom and not return. This happens when a person does not feel well so they excuse themselves to go to the bathroom – and their illness is the beginnings of a heart attack

Studies show when professionals learn CPR skills in their work place – when an emergency occurs they do not freeze, forgetting what they are to do. Rather, they recall the procedures they learned and do them effectively.

#### 2. HIGH QUALITY AND WELL ORGANIZED TRAINING

CPR Professionals programs are well organized

- **AHA Guidelines** – We follow the American Heart Association guidelines when explaining the life saving procedures and why each step is vital to the process
- **No boring lectures** – An interesting and informative AHA video is shown that covers the course content
- **Equipment** - It is up-to-date and high quality
- **Hands-on-practice is our main focus!** Multiple instructors give a large group, a small group feel. We use extra manikins to avoid waiting time to practice
- **Memory Joggers** - When trainers demonstrate procedures for handling emergencies, they give easy ways to remember what to do first, second, etc.
- **Question and Answer Discussions**

#### Testimonial

**Sarah Krueger – Magellan Midstream Partners, L. P.** "Our experience with CPR Professionals was **organized, effortless and stress free**. The staff was accommodating and positive I would definitely recommend them. Thanks."

#### 3. CLASS COMFORT AND CONVENIENCE

- **Training Site** - Onsite or offsite training is available
- **Flexible Class Size** - We can certify a large group or break them into smaller groups at no additional cost
- **Scheduling** - We work around our customer's schedules to give them training 24 hours a day, 365 days a year.

#### Testimonial

##### Kim Chester – Arden Dental

"I enjoyed your instructor, the up-to-date videos and especially the small class size as it was very comfortable"

#### 3. SERVICE - If you Need it, we Will Accommodate it!

- **Confirmation** – A personal trainer is in touch within 48 hours when a firm books training, to confirm the booking, introduce themselves and gather audience profile details
- **Availability** - Can call anytime and talk with an instructor
- **Flexible Billing** – Can be paid at class or can be billed
- **Flexible Payment** - Individuals or firms can pay the bill

#### 5. EXCEPTIONAL TRAINERS

##### Standard Instructor Qualifications Required:

- To be medical professional, i.e., nurse, EMT
- To have 10 years work experience

##### What Sets Our Trainers Apart from other Trainers?

##### There are Numerous Kinds of Learning Styles

In addition to the standard requirements, we require our instructors to be EXPERIENCED ADULT EDUCATORS. We do this because knowing people's many learning patterns and how to train to reach each adult in the audience – comes only with adult educator experience. This ability has a significant impact on the ease with which each participant gains the knowledge and skills needed.

#### Testimonial

##### Michael Stoughton – Action Coach

"I found being able to practice the skills with the guidance of your instructors, in a relaxed comfortable environment, made learning much easier. I had been certified before, however, this practice has made me feel much more confident in my ability to assist in a life threatening situation." Great job!

Our instructors LOVE TO TEACH – and it shows!!!

#### BLS TRAINING COURSE COMPONENTS

The components of these courses are:

- Adult, Child, Infant CPR
- 2 Person Rescue
- Bag Mask with Oxygen
- Cricoid Pressure
- AED Training
